

## **FREE Computer Network Analysis Checklist**

**For NO CHARGE, TCG will help you check five VERY important areas relating to your computer network and systems:**

- ✓ **CHECK** on whether your computer systems are being most effectively used to support your business objectives, core services and other business-critical functions.
- ✓ **CHECK** the cost of maintaining and supporting your computer network and systems to determine if you are gaining the best possible return on your investment.
- ✓ **CHECK** the level of performance and stability of your network, servers, workstations and other standard office applications such as email, websites, firewalls and backup systems.
- ✓ **CHECK** the way your valuable business information/data is being protected from unanticipated loss or destruction.
- ✓ **CHECK** your approach to computer hardware and software procurement to determine if cost savings are being maximized.

**Our aim is to help our clients lower the Total Cost of Ownership of their computer network and systems, while maintaining the optimal level of computer system performance and stability.**
